For Agency Workers Contracted via Capita the above Umbrella Companies are on our Approved list.

Capita have completed certain checks upon each company's addition to the list, at that time we were reasonably assured that the companies were aware of their requirements and obligations. Compliance in the area of intermediaries can be very complex and best practice can change very quickly. You should therefore be aware that compliance checking is not intended to be, and cannot be, a comprehensive audit on which you, or any third parties can rely. Compliance checking does not re-place the need for you to carry out your own checks using professional advisors. This list comprises UK "Umbrella" Companies and is designed for individuals who reside and work in the UK.

It is entirely your decision on the route you decide to take and if you are unsure on any point we would encourage you to seek independent advice before you engage through any Umbrella. Capita does not endorse the benefits of operating through an Umbrella or advise and/or encourage Capita contractors to operate via any particular provider we have listed in this document. Capita cannot give any guarantee concerning the quality of the advice and/or documentation provided by such third parties and it is your responsibility to ensure that any company established complies with all current relevant legislation. Capita will not be liable for any losses, costs, claims, expenses, penalties or other liabilities incurred by that company, including those which arise as a result of your use of the services of such third parties. Although this document details the companies' website addresses, Capita does not check the security of these websites, visiting the web-sites is at your own risk, we also suggest checking their information on Cookies and Privacy.

The list of companies listed in this document is neither permanent, exhaustive nor necessarily covers all Capita businesses. Capita reserves the right to remove entities from the list should any of the providers fail to satisfy compliance checking procedures at any time. If an umbrella provider listed is removed from the list, we may ask you to provide your services through an alternative provider.
